SUMMARY

Dynamic and **detail-oriented** Web Developer with a capacity for **conceptualising** and **delivering** elegant, user-friendly solutions with a passion for **pixel-perfect UI** and **sleek UX**. Always curious and brave to **learn, share and incorporate** new technologies to deliver the top quality apps. Enthusiast of **Agile** Software development, Regular participant and mentor at Codebar and Founders and Coders web developer meetups.

TECHNICAL SKILLS

Web Technologies and Frameworks: JavaScript, React.js, HTML5, CSS3, Node.js, Express.js, TypeScript, GraphQL, Python, Django,

React: Context API, React Router, React Hooks

UX/UI: Figma, Material UI, Styled Components, Bootstrap

Database and ORM: MySQL and PostgreSQL

Deployment Tools: CI/CD, Travis, Heroku, Netlify

Testing Libraries: Jest, Cypress, Tape, SuperTest, Codecov

EDUCATION

Ilia State University
BA in Literature studies and Linguistics

3.7 GPA in a major of Literature studies and a minor of a Liberal Arts.

Received an award for contributing to gender studies with my thesis.

EXPERIENCE

Prepare me - Full Stack Developer

06/2020 - 07/2020

Prepare Me is a platform created for parents with kids with autism. On the platform parents are able to create printable books from templates to tell the social stories to their kids.

- Engineered functional **React components** and implemented **Cloudinary** to enable upload feature for the users.
- Improved applications **state management** by incorporating **Context API**.
- Developed user-centric MVP by implementing **mobile-first design** principles combined with weekly **user research** feedbacks

Bechdel and Beyond - Trainee Software Developer

2/2020 - 6/2020

Bechdel and Beyond is a platform that enables users to search for films and check if the movies pass the Bechdel test and alongside display gender parity for the crew and cast. Users are also able to submit their reviews and vote for the films.

- Successfully deployed the **REST API** on **Heroku** and front end **React app** on **Netlify** as **DevOps** lead.
- Adding extra security layer by incorporating **JWT** refresh tokens.
- Gathered, populated and organised data in the **database** to create a suitable API for the project by integrating **third part APIs** and writing advanced **PostgreSQL** queries.

Plant On Demand - UX/UI Internship

5/2019 - 12/2019

Plant On Demand is an online platform that digitizes and optimizes the processes of buying and selling agricultural products.

- Conceptualising mock-ups on **Figma** and Bringing them to life using HTML, CSS and **JavaScript**.
- Closely working with developers to ensure designs were efficient and technically sound.
- Creating **modular, responsive** templates using modern CSS

HOBBIES

I love cycling and that's my main vehicle to commute. I am also an active climber and can challenge V5 routes. I love reading graphic novels and believe me Alejandro Jodorowsky's and Moebius's collaboration is the best.

ACHIEVEMENT

I started a project that raised the community awareness in my home town among young people thorough presenting and bringing new books to a local library.
